

## Chapter 1 Introduction

### Disaster Mitigation Act of 2000

**§201.4(c)(6): A Plan Adoption Process. The plan must be formally adopted by the State prior to submittal to us for final review and approval.**

**§201.4(c)(7): The plan must include assurances that the State will comply with all applicable Federal statutes and regulations in effect with respect to the periods for which it receives grant funding, in compliance with 44 CFR 13.11(c). The State will amend its plan whenever necessary to reflect changes in State or Federal laws and statutes as required in 44 CFR 13.11(d).**

### 1.1 Purpose of the State Hazard Mitigation Plan

*The Commonwealth of Virginia Emergency Operations Plan, Support Annex-3 - Standard & Enhanced Hazard Mitigation Plan provides guidance for hazard mitigation within the Commonwealth. Its vision is supported by goals, objectives and strategies for Virginia state government that will reduce or prevent injury from natural hazards to citizens and critical state facilities. This plan is supplemented by: agency Continuity of Operations Plans, agency strategic plans, and the other sections of the Commonwealth of Virginia Emergency Operations Plan.*

This plan fulfills the standard and enhanced state mitigation planning requirements (44 CFR §201.4 & §201.5) of the Disaster Mitigation Act of 2000 (DMA2K; Public Law 106-390, signed into law October 10, 2000). The DMA2K amends the 1988 Robert T. Stafford Disaster Relief and Emergency Assistance Act, and reinforces the importance of mitigation planning, emphasizing planning for disasters before they occur. Section 322 of the act specifically addresses mitigation planning at state and local levels. New requirements are identified that allow Hazard Mitigation Grant Program (HMGP) funds to be used for mitigation activities and projects for states and localities with Hazard Mitigation Plans approved by November 1, 2004. States that have developed a comprehensive, *enhanced* mitigation plan prior to a disaster will qualify for higher levels of HMGP funding.

The Commonwealth of Virginia Standard & Enhanced Hazard Mitigation Plan thus meets the requirements as detailed in Interim Rule 44 CFR §201.4 & §201.5 and as published by the Federal Emergency Management Agency February 28, 2004. The Standard Plan was approved by FEMA Region III on September 28, 2004 whereas the Enhanced Plan was recently approved on March 14, 2007. The Commonwealth has obtained this enhanced plan status through the submittal of Chapter 7 of this plan. Both approval letters may be found in Enhanced Appendix 1. A copy of the Enhanced plan approval letter follows on page 1-2.

U.S. Department of Homeland Security  
Region III  
One Independence Mall, Sixth Floor  
615 Chestnut Street  
Philadelphia, PA 19106-4404

**FEMA**

MAR 14 2007

Mr. Michael M. Cline  
State Coordinator, Commonwealth of Virginia  
Department of Emergency Management  
10501 Trade Court  
Richmond, Virginia 23236-3713

Dear Mr. Cline:

The U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) Region III has approved the *Commonwealth of Virginia Emergency Operations Plan, Volume 6: Standard and Enhanced Hazard Mitigation Plan*. We understand that your November 10, 2006 letter endorsing the Plan as the Governor's Authorized Representative serves as the Commonwealth's adoption of the Plan per the Governor's April 1, 2004 Executive Order. The Commonwealth is now eligible to apply for the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) programs from the date of this letter until the three-year anniversary date of this approval, at which time an updated Plan must be approved according to applicable regulations including those listed below in paragraph three.

FEMA approval of your Plan ensures the continued availability within the Commonwealth of non-emergency Stafford Act funding (Pre-Disaster Mitigation planning and project grants, Hazard Mitigation Grant Program planning and project grants, Fire Management Assistance, and Public Assistance categories C-G). All requests for funding, however, will be evaluated individually according to the specific eligibility and other requirements of the particular program under which the application is submitted. For example, a specific mitigation activity or project identified in the Plan may not meet the eligibility requirements for FEMA funding, and even eligible mitigation activities are not automatically approved for FEMA funding under any of the aforementioned programs.

The following comments may assist the Commonwealth in future updates to the Plan:

1. FEMA recently released guidance for States on how to complete plan updates to meet 44 CFR 201.4. The Standard portion of Virginia's Plan was not reviewed against the update guidance because of the timing of the Commonwealth's request. However, the next update projected for 2010 will be subject to meeting all plan update requirements.
2. The guidance for updates to the Enhanced Plan elements under 44 CFR 201.5 is currently being developed by FEMA and is expected to be released late spring 2007. This will be utilized for the review of the Commonwealth's update.
3. The adoption procedures for updated plans must be clearly explained in the plan or in the adoption documentation and consistent with the plan update guidance. For example, where the Governor's Authorized Representative or other administrative body has the designated authority for adoption, the plan must explain how and by whom this is to be completed.

We look forward to continuing a productive relationship between the Commonwealth and our office. Please contact our Mitigation Division Director, Eugene K. Gruber, at 215/931-5669, or me with any questions or for further assistance.

Sincerely,

  
Patricia G. Arcuri  
Acting Regional Director

cc: Deborah G. Mills, Mitigation Program Planner

Meeting the requirements and criteria of section 322 regulations and rules qualifies the Commonwealth to obtain all disaster-related assistance including categories C through G of the Public Assistance Program. This is an essential component of disaster recovery. In addition, the Commonwealth will remain eligible for Hazard Mitigation Grant Program funds and the nationally competitive Pre-disaster Mitigation Program.

This plan is *Support Annex-3* of the *Commonwealth of Virginia Emergency Operations Plan (COVEOP)*. The COVEOP and its sub plans listed below are maintained by state agencies with emergency management duties and responsibilities. Selected parts of these plans are available online for viewing or download from the Virginia Department of Emergency Management Online Library at <http://www.vaemergency.com/library/eplan.cfm>. Reference copies of the COVEOP are also available at community college and public university libraries statewide. Distribution of the Transportation EOP & Volume IV is limited to specific individuals and user groups.

The COVEOP has been revised to assure, among many things, full compliance with the National Response Plan and Continuity of Operations Planning. In addition, the plans are being cross-walked and fully integrated through the current revision of Volume 1 – Basic Plan and Volume 2 (SA-2) -Disaster Recovery. In the past the plans were segmented annexes.

The volumes that comprise the entire Commonwealth of Virginia EOP include:

<b>Table 1-1      Commonwealth Emergency Operations Plan</b>		
<b>Volume</b>	<b>Title</b>	<b>Status</b>
<b>1</b>	<i>Basic Plan (Includes Compendium of Agency Response Plans)</i>	2007
<b>2</b>	<i>Emergency Support Functions (ESFs) &amp; Support Annexes</i>	2007
<b>3</b>	<i>Radiological Emergency Response</i>	2006
<b>4</b>	<i>Hazardous Materials Response &amp; Terrorism Consequence Management</i>	2005
<b>5</b>	<i>Hurricane Emergency Response</i>	2006

Sine mitigation terms are used throughout the field of emergency management, Appendices A and B provide listings of acronyms and a glossary of terms. The table that follows provides a more detailed listing of hazards as addressed by the *Commonwealth Emergency Operations Plan*.

Water pollution -- groundwater	4				X				

Authority to implement the plan is further clarified beyond the *Code of Virginia* through an Executive Order which VDEM is in the process of obtaining. This Executive Order will reflect *Code of Virginia* amendments and all revisions to the Commonwealth of Virginia Emergency Operations Plan to date, including those to Support Annex-3.

## **1.2 Disaster Mitigation Act of 2000 and Implementing Regulations**

Section 322 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act or the Act), 42 U.S.C. 5165, was enacted under § 104 of the Disaster Mitigation Act of 2000, (DMA 2000) Public Law 106-390. DMA 2000 was intended to facilitate cooperation between state and local authorities. It encourages and rewards local and state disaster planning in advance of disasters in order to promote sustainability of communities and services as a strategy to improve disaster resistance. This enhanced pre-disaster planning effort is intended to support state and local governments' efforts to articulate accurate, targeted and prioritized needs for hazard mitigation that will reduce exposure to natural hazards. This planning effort will result in timely allocation of funding and more effective risk reduction strategies and projects.

FEMA prepared an Interim Final Rule, published in the Federal register on February 26, 2002 within 44 CFR Parts 201 and 206 that establishes planning and funding criteria for states. The Standard Plan Crosswalk may be found in Appendix J.

### **44 CFR Part 201**

44 CFR § 201.1 *et seq.* was promulgated by the Federal Emergency Management Agency, (FEMA) on February 26, 2002 in order to implement DMA 2000. The rule addresses state mitigation planning, and specifically in 44 CFR § 201.3 ( c ) identifies the states' mitigation planning responsibilities, which include:

- 1) Prepare and submit to FEMA a Standard Hazard Mitigation Plan following criteria established in 44 CFR § 201.4 as a condition of receiving Stafford Act assistance (except emergency assistance).
- 2) For consideration for 20% Hazard Mitigation Grant Program funding, prepare and submit an Enhanced State Mitigation Plan in accordance with 44 CFR § 201.5, which must be reviewed and updated, if necessary, every three years from the date of the approval of the previous plan.
- 3) Review and if necessary, update the Standard State Mitigation Plan by November 1, 2004, and every three years from the date of approval of the previous plan in order to continue program eligibility.
- 4) Make available the use of up to the seven percent of HMGP funding for planning in accordance with 44 CFR § 206.434. See 44 CFR § 201.3 ( c ).

44 CFR § 201.4, *Standard State Mitigation Plans*, lists the required elements of state hazard mitigation plans. Under 44 CFR § 201.4 (a), by November 1, 2004 states must have an approved Standard State Hazard Mitigation Plan that meets the requirements of the regulation to receive Stafford Act assistance. The planning process, detailed by 44 CFR § 201.4 (b), must include coordination with other state agencies, appropriate Federal agencies and interested groups.

44 § 201.4 (c), "Plan content," identifies the following elements that must be included in a state hazard mitigation plan:

- 1) A description of the planning process used to develop the plan;
- 2) Risk assessments that provide the factual basis for activities proposed in the strategy portion of the mitigation plan;
- 3) A Mitigation Strategy that provides the state's blueprint for reducing losses identified in the risk assessment;
- 4) A section describing Coordination of Local Mitigation Planning;

- 5) A Plan Maintenance Process, including a method and schedule for monitoring, evaluating and revising the plan; a system for monitoring implementation of mitigation strategies and projects; and a system for reviewing progress in achieving goals, objectives and strategies as well as project implementation;
- 6) A Plan Adoption Process for formal adoption by the State Prior to submittal to FEMA for final review and approval; and
- 7) Assurances that the State will comply with all applicable Federal statutes and regulations in effect with respect to grant funding periods, in compliance with 44 CFR 13.11( c ). The state must amend its plan whenever needed to reflect changes in state or federal laws and statutes as required by 44 CFR 13.11 (d).

## **44 CFR Part 206**

On February 26, 2002, FEMA also changed 44 CFR Part 206 in order to implement DMA 2000 (See 67 *Federal Register* 8844 [February 26, 2002]). Changes to 44 CFR Part 206 authorize hazard mitigation grant program funds for planning activities and increase the amount of HMGP funds available to states that develop an Enhanced Mitigation Plan.

In addition, through 44 CFR § 206.400, states receiving any disaster assistance funding under the Stafford Act must conduct repairs or construction funded by a disaster loan or grant in accordance with applicable standards such as the minimum standards of the National Flood Insurance Program (NFIP) and standards substantially equal to the recommended provisions of the National Earthquake Hazards Reduction Program (NEHRP). See Appendix C for the Stafford Act planning regulations.

Virginia Capital, Richmond, Virginia

## **1.3 Assurances & Adoption**

The plan serves as Support Annex-3 of the *Commonwealth of Virginia Emergency Operations Plan* (COVEOP) and is to be submitted as part of the complete *Commonwealth of Virginia Emergency Operations Plan* to the Governor for adoption by mid-2007. In addition, the plan has been cross-walked through the Emergency Management Accreditation Program (EMAP) and has been deemed consistent with the standards of EMAP relative to hazard mitigation. The Commonwealth of Virginia's Emergency Management Programs achieved accreditation through the EMAP on November 11, 2005. This accreditation included the three hazard mitigation measures.

**§44-146.17. Powers and Duties of the Governor.**

The Governor shall have, in addition to his powers hereinafter or elsewhere prescribed by law, the following powers and duties:

(1)...He may adopt and implement the Emergency Operations Plan, which provides for state-level emergency operations in response to any type of disaster or large-scale emergency affecting Virginia and that provides the needed framework within which more detailed emergency plans and procedures can be developed and maintained by state agencies, local governments and other organizations.

(2) To appoint a State Coordinator of Emergency Management and authorize the appointment or employment of other personnel as is necessary to carry out the provisions of this chapter, and to remove, in his discretion, and all persons serving hereunder;

**§44-146.22. Development of measures to prevent or reduce harmful consequences of disasters.**

In addition to disaster prevention measures included in state, local and inter-jurisdictional emergency operations plans, the Governor shall consider, on a continuing basis, hazard mitigation or other measures that could be taken to prevent or reduce the harmful consequences of disasters. At his direction, and pursuant to any other authority, state agencies, including, but not limited to, those charged with responsibilities in connection with floodplain management, stream encroachment and flow regulation, weather modification, fire prevention and control, air quality, public works, land use and land-use planning, and construction standards, shall make studies of disaster prevention. The Governor, from time to time, shall make recommendations to the General Assembly, local governments, and other appropriate public and private entities as may facilitate measures for prevention or reduction of the harmful consequences of disasters.

*The Code of Virginia § 44-146.17* allows the Governor to appoint an Emergency Coordinator to carry out all provisions of the Code of Virginia relating to emergency preparedness, response and recovery.

*The Code of Virginia § 44-146.22* specifically authorizes the Governor to consider hazard mitigation measures to prevent or reduce the harmful consequences of disasters. The Governor is expected to make recommendations to the General Assembly, local governments, and appropriate public and private entities. This Plan supercedes the hazard mitigation plan developed in 2001 and 2004, and constitutes *Support Annex-3 of the Commonwealth of Virginia Emergency Operations Plan (COVEOP)*.

The Commonwealth of Virginia, Department of Emergency Management, pledges that it will:

1. Comply with all applicable Federal statutes and regulations in effect with respect to periods for which it receives grant funding, in compliance with 44 CFR 13.11(c); and
2. Amend this plan whenever necessary to reflect changes in State or Federal laws and statutes as required in 44 CFR 13.11(d).

## 1.4 Planning Team

Funding assistance for the preparation and printing of this plan was provided by the Federal Emergency Management Agency (FEMA) and is prepared in accordance with appropriate regulations and guidance provided by that agency.

This plan was completed with planning assistance and support by the mitigation program staff at the Virginia Department of Emergency Management (VDEM). Staff from FEMA Region III offices provided additional technical assistance and plan review. The Virginia Tech Center for Geospatial Information Technology (CGIT) performed the hazard and risk identification and the vulnerability analysis. In addition, the Center's staff supported the plan web site that was used to solicit mitigation project worksheets. The project and strategy prioritization process was managed by the Center.

The University of Virginia Institute for Environmental Negotiation provided facilitation to the final two State Steering Committee meetings and collaborated on development of project ranking protocols.

Technical mapping, hazard, and vulnerability analyses were accomplished by VDEM and CGIT staff using ESRI ArcGIS 8.2 software, with spatial data provided by the Virginia Geographic Information Network (VGIN), the United States Geologic Survey (USGS), the National Weather Service (NWS), the Virginia Department of Treasury Division of Risk Management (VDT-DRM) and the Virginia Department of Forestry (DOF).

Critical to the development of the plan was the participation and contributions of more than 105 state and federal agencies, non-profit organizations and Virginia colleges and universities. Representatives attended four meetings of the State Hazard Mitigation Steering Committee, provided critical facilities data, submitted hazard mitigation strategies and projects, ranked activities and reviewed the plan draft. In addition, many of these Steering Committee participants will continue to serve ongoing hazard mitigation sub-committees that will guide and direct implementation of this plan. In addition, their support will determine continued data and information required for future plans that must integrate human-caused hazards into the current hazard identification and vulnerability assessment. Table 1-2 provides a list of organizations that provided valuable input to the plan. A full description of the planning process follows in Chapter 2 *Planning Process*. A full listing of the Mitigation Steering Committee may be found in Appendices D and I.

## 1.5 Overview of Plan

Each chapter begins with the appropriate requirements from the Disaster Mitigation Act of 2000 to provide reference and context to the issues discussed within the chapter. A brief introduction to the section is followed by relevant information, charts, tables, and maps, which fulfill regulation requirements. The main chapters of the plan follow primary requirements of the hazard mitigation planning law:

**Chapter 2.0 *Planning Process*** describes the activities and work of the State Hazard Mitigation Steering Committee, VDEM staff, Virginia Tech and the University of Virginia. The plan participants, planning process, planning products and relevance to other related plans or Commonwealth functions is described.

**Chapter 3.0 *Hazard Identification and Risk Assessment*** has three primary components. A description of the Commonwealth is provided that includes:

- population distribution and characteristic
- business and industry
- agriculture
- locations of state government facilities, including those deemed critical

Natural hazards affecting the state are identified, including:

- descriptions and histories of hazards
- assessment of geographic extent and risk of hazards
- hazard specific loss estimation for state facilities

A summary assessment of the potential losses and risks is provided. A HIRA revision to support a new vulnerability assessment was initiated in late 2005 to incorporate data from local and regional plan HIRAs. This will be continued as an ongoing process as resources become available.. A similar DRU database will be created as DRU plans are completed. Loss estimation data provided from approved local and regional hazard mitigation plans is being uploaded into the state's hazard mitigation database.

**Chapter 4.0 *Hazard Mitigation Strategy*** has multiple components. The Commonwealth's capability to respond to assessed hazards is described. A listing of limitations of the planning process, data and analysis methods used in the plan is discussed, along with provisions for the 2007 plan revision. The Chapter 3.0 vulnerability assessment influenced development of the hazard mitigation vision, goals and objectives necessary to reduce the risk from hazards across the state to specific state facilities and citizens. The final section presents the program strategies and projects ranked "critical" and "high" for importance to reduce exposure to hazards. A complete listing of projects and strategies is presented in Appendix H. A state planning data base of local and regional goals, objectives and strategies has been created that reflects the mitigation measures detailed in each of the 27 local or regional plans

**Chapter 5.0, *Coordination with Local Mitigation Planning Efforts***, describes a comprehensive three-year process to engage all Virginia communities in hazard mitigation planning. To date, 27 plans have been funded and drafted. Twenty-two have been fully adopted and approved by FEMA, four are conditionally approved with the local adoption process underway and one plan has completed its HIRA and has begun mitigation strategy development. Finally, seven Disaster Resistant University planning processes are underway or completed for Radford, Virginia State, Virginia Tech, Old Dominion, George Mason Universities as well as the University of Mary Washington and the University of Virginia.

**Chapter 6.0, *Plan Maintenance, Implementation and Adoption***, outlines implementation of the plan and development of the anticipated 2007 plan revision. Processes used to maintain and update data and information contained in the hazard identification and vulnerability assessment databases are described. Plan adoption and revision are also described, augmented with a timeline. This chapter has been expanded to detail 18-month progress review and plan revisions that have occurred since the plan was approved in late 2004.

**Chapter 7.0 *Enhanced Plan*** follows provisions in the Stafford Act for additional Funding through development and approval of an Enhanced Plan. The Enhanced Plan chapter is supported by Enhanced Appendices. The Enhanced Plan was submitted to FEMA in August 26, 2005, and again in June 22, 2006. Resubmitted once again along with the Standard Plan revision on November 6, 2006, it was approved on March 14, 2007.

**Appendices** may be found immediately following the plan. These provide detailed listings and agendas from each Steering Committee meeting, details on hazard identification and vulnerability assessment as well as the complete listing of agency-proposed goals, objectives and supporting strategies and proposed projects. The strategies and projects are each given a priority rating of "Critical," "High," "Medium," and "Low."

#### **Standard Plan Appendices:**

*Appendix A* includes a list of acronyms used in the plan.

*Appendix B* includes a glossary of definitions for terms used in the *Commonwealth of Virginia Hazard Mitigation Plan*.

*Appendix C* presents the federal legislation directing the planning process.

*Appendix D* provides profiles of major state and federal agencies and private non-profit organizations that participated during the planning process.

*Appendix E* contains documentation regarding the four State Steering Committee meetings conducted from July 2003 through July 2004.

*Appendix F* includes tables and documentation of the hazard and risk identification process; the vulnerability assessment and potential loss estimates are also included.

*Appendix G* provides summary information regarding development of the 29 local mitigation plans approved or under development by regional planning district commissions, regional groups and individual cities, counties or towns.

*Appendix H* is the comprehensive list of the four goal areas, supporting objectives, strategies and projects as prioritized by members of the State Steering Committee.

*Appendix I* provides the complete listing of those contributed to this plan through participation in the planning process.

*Appendix J* contains the Virginia Standard State Hazard Mitigation Plan Crosswalk document.

*Appendix K* includes the sample HAZARD MITIGATION GRANT PROGRAM Administration Plan, in this case from DR-1661.

#### **Enhanced Appendices:**

*Appendix 1* is the Standard & Enhanced Plan approval letters (dated September 28, 2004 and March 14, 2007) from Acting Regional Director Patricia Arcuri to State Coordinator Michael M. Cline.

*Appendix 2* contains five Benefit-Cost analysis examples for multi-structure projects performed by VDEM staff.

*Appendix 3* contains documentation of the VDEM grant application process, including the application and project ranking sheets used by the Structural Mitigation Subcommittee.

*Appendix 4* provides examples of quarterly reports.

*Appendix 5* outlines the project closeout schedule.

*Appendix 6* examines cost-avoidance procedures.

*Appendix 7* provides examples of workshop materials, particularly the Elevation Workshop manual developed for local governments sponsoring DR1491VA Hurricane Isabel elevation projects.

*Appendix 8* provides a copy of the Commonwealth of Virginia budget bill and an example of a post-disaster decision brief which allows for a 20% HMGP match from funds “sum-sufficient” per *The Code of Virginia*.

*Appendix 9* includes the disaster recovery FEMA-Commonwealth Mitigation Strategies for DR1491VA – Isabel and DR1544VA – Gaston.

*Appendix 10* is the revised Enhanced Plan Crosswalk.

*Appendix 11* is the local and regional plan data base of mitigation strategies as well as a two-page summary of this detailed database.

*Appendix 12* provides a summary listing of the Mitigation Database of the more than 1,200 properties statewide that have been mitigated through FEMA-Commonwealth mitigation programs during the past two decades.

*Appendix 13* is the DCR Floodplain Management Plan.
